### What's New in the SQL Server Utilities?

NIM Attach DB 3.0 enables you to create a SQL Server 2000 database on any number of SQL Server 2000 instances from a single instance of NIM. It is a standard SQL script, with a GUI, that allows you to attach and detach databases using a single right-click from the Main menu of NIM. It allows you to configure a connection name for the SQL Server instance, a database name, and a server name, allowing you to create a SQL Server 2000 instance of databases. SQL Query Tool (VsqlW 1.0.3) is a SQL Query tool for a SQL Server 2000 database. It allows you to use SQL queries with a standard SQL syntax using a Graphical User Interface, and does not use an '!' command like SQL Server Management Studio. It does not require the Microsoft SQL Server Data Tools. This tool was originally written by Clément Chaperon. It is a freeware tool that you can download from here: Usage: - Open NIM and go to the Tools menu -> Attach a Database -> NIM Attach DB 3.0.
