You would know what we are talking about. You just go to the Playlist Settings and add songs, and you are good to go. For some of us, however, this part of the Spotify desktop app is more of a headache than a convenience. The first thing you need to do is make sure you have created and logged into a Spotify account. Next, you need to make sure that the Spotify desktop app is open. Open the Spotify app. You can find it in the Start menu, or in your taskbar. On the search page of the Spotify app, simply type "playlist settings". Click the search button and you will see all the music you have in your Spotify library. Hover over

the music in your library, and a menu will appear. From this menu, you can create or edit playlists, as well as add or remove songs from the library. Note: If you are already in a playlist, you will only see songs that are in the playlist. There is no way to manage a playlist other than to create a new playlist from scratch. As you hover over the items in your library, a menu will appear that allows you to view song information, such as artist name, album name, and song title. You can also change song information, such as the name of the song. For example, click the name of the song

There is an option in the about box to manually get the lyrics which is good for Spotify. Edited March 20, 2016 by Lars Was this review helpful? Simple and smooth lyrics app I like the app and the ease of use. This app is fairly simple and very intuitive. Was this review helpful? Awesome simple lyrics app I've tried a lot of different lyrics apps for my podcasts, and this one is the best. It is easy to use, has a beautiful interface, and shows the lyrics without any extra muss and fuss. Highly recommended. Was this review helpful? Good lyrics app for easy listening It seems to work really well, but the problem with using the desktop version is that it doesn't seem to be able to handle more than 3 or 4 songs at a time, and shows a blank screen when more than 3 songs are selected. But it's pretty easy to navigate and you can start or stop as you wish. The problem with Spotify's lyrics though is that they don't always seem to be up to date with the current chart position. Was this review helpful? Great app but needs more I love this app. In theory it's a dream come true for me. I'm a big fan of listening to my music as I work and have the lyrics handy. This was a great app until they updated the lyrics database. It needs to be updated every day. They have no idea who is releasing songs and they don't have a good handle on which bands are breaking up or not. Also a lot of songs aren't marked as being sung by a man or a woman. They need to work on that. Was this review helpful? Fantastic It's easy to use and the lyrics are amazing. I've tried many and this is the best I've found. The song length cut out is a little short but it's
